

Sizing Charts

The right bat for you is one that lets you generate maximum bat speed. You accomplish this with a bat that's not too long or too heavy. The best way to find the "right" bat is to start with the sizing chart. Then try different size bats in that general length range. The bat that feels "comfortable" and "easy to swing" should be selected.

Baseball Glove Sizing Chart

Age	Position	Glove Size
Under 8	Infield	9 inches
Under 8	Outfield	11 inches
9-13	Infield	9-10 inches
9-13	Outfield	11-12 inches

Youth and Beginner:

Gloves that are too big allow "cheating," preventing beginners from developing and refining proper skills. Children's gloves should not be bought to grow into. The best way to learn the fundamental of fielding and catching is by wearing a glove that fits well.

Children 12 and Under:

No larger than 12 inches. Children 8 and older should try gloves in the 11s, while younger Children (especially if they are smaller) should consider gloves in the 9 to 11 inch range.
